Summary

Since 2012 I have been working as a Software Developer. I manage my projects carefully in accordance with software development standards. My areas of experience are accounting, e-commerce, B2B, sales systems, restaurant automation, cash register, telecommunication and integration of payment systems.

Technologies that I mainly use; Javascript, Typescript, Go, Angular 2+, React. In addition, I worked in many different projects in different technologies and languages such as Java, C++ (JNI), Android, React Native, NestJS, GraphQL and SOAP. I've started to learning GO in 2021.

I am also writing articles at medium.com/@ozanturhan, and I have contributed to open source libraries like Ngxs and Spectator.
